

DREAMWEAVER ASSIGNMENT

Date: 10/27/04

Objective: To create a website using Macromedia's Dreamweaver software. You will create a site file, an index.html page, links to PDF documents in your site file, hyperlinks and e-mail links, use different fonts, styles and background colors.

Assignment:

1. Find your student folder on the computer. Create a new one if you do not have one.
2. Save your resume and bio as PDF documents in your student folder. Those files should already be in your student folder.
3. Save a copy of your picture in your student folder. If you can't find your picture, they are available at: <http://homepage.mac.com/edcalle/PhotoAlbum8.html>
4. Open Dreamweaver.
5. Go to the **Site** menu. Select **Manage Sites**.
6. Select **New: Site**
7. Name your site: www.YourName.com
8. Choose your student folder as the root folder. This will be the folder where all of your site information will reside.
9. From the **File** menu, create a new **Basic Page: HTML document**. Save it as index.htm. You must call it index.htm or your page will have no homepage or starting point. You will be lost in cyberspace. OH NO!
10. From the **Insert** menu choose create a table and create a table with 2 rows and two columns.
11. Select the 2 cells in the top row. They should both be highlighted. Go to **Modify:Table:Merge Cells**. You should now have one large cell. Type your name.
12. In the **Properties** section at the bottom of the page, select your name and change the font size, style and color to your preference. If the **Properties** pane is not visible go to: **Window:Properties**.
13. Choose the next lower cell. Go to **Insert: Images** and choose your picture. The cell should size automatically. From the **Properties** menu edit the picture so that it is centered and choose a background color for the cell. Also note that your site folder will now contain an images folder and your picture will be inside that folder.
14. Save the PDF resume and bio documents into you assets folder inside the Dreamweaver site folder.
15. In the fourth cell insert the following:
 - An e-mail link to your e-mail address.
 - A hyperlink to <http://www.drcalle.com/mum2703.htm>
 - Type "Resume" and in the **Properties** pane at the bottom drag the compass to the right of the **links** bar to the resume.pdf file. You should see an arrow

pointing while you drag. The name and location of the file will appear in the *links* bar.

- Type the word “bio” and repeat the procedure choosing the bio.pdf file this time.

You have now created a site folder and an Index page or home page for your website. You are well on your way to creating your music business website.

See you next week.
